

Vignette 3 - IDIV / SASO

D+60 - MC

Situation:

US and Greenland forces have successfully defeated Redland forces operating in Greenland and reestablished the International Border. US Government is now assisting in the rebuilding of the infrastructure while relief agencies assist displaced residents and refugees fleeing Redland.

Task & Purpose:

Secure the APOD and LOCs to facilitate on-going rebuilding/relief operations. Monitor UN Zone of Separation to ensure Redland's compliance. ROE permits the engagement of Redland forces in this zone.

Task Organization:

IDIV (-)

Div TAC

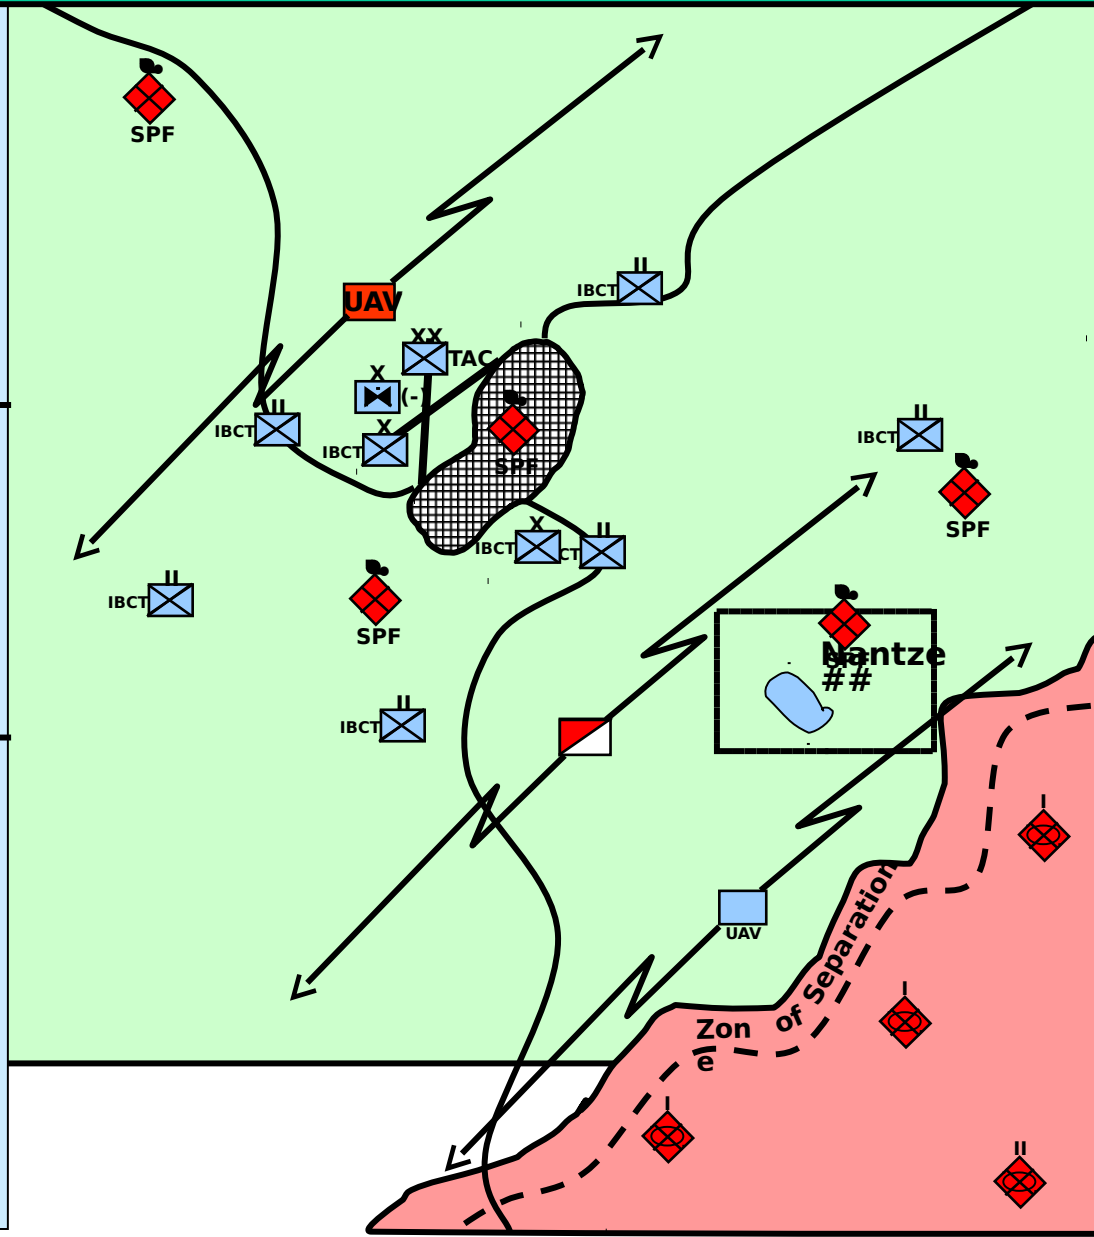

2 x IBCT

AVN BDE (-)

1 x MFB(+)

1 X UH60 Co

1 x UAV Co

Situation:

Although the Redland conventional forces were defeated and withdrew from Greenland, Redland doesn't recognize the UN established Zone of Separation and continues to conduct small scale operations in Greenland. Remnants of the Special Purpose Forces and GPLA still remain in Greenland and continue to instigate anti-Greenland demonstrations and subversive activities.

Task & Purpose:

Ultimate purpose remains to discredit Greenland government and annex Greenland. They are currently conducting activities to destabilize the pro-US government, disrupt the relief effort in Greenland, and hinder the rebuilding of Greenland's infrastructure.

UN Delegation Mission Support

Situation: US forces are providing security for a meeting between a UN delegation and the regional leader of the Greenland Peoples liberation Army (GPLA) in Nantze. A IBCT is providing one Mech Co as convoy escort, and three infantry platoons to man roadblocks along with avenues of approach. The MFB lift Co is providing UH60s to move the roadblocks into place and the C2 helicopter for the operation. The MFB Cav TRP is conducting a route recon and convoy security as well as screening south to the Redland border. The MFB Atk Co is providing overwatch around the village of Nantze.

Situation:

Redland SPF Purpose Forces and GPLA loyal to Redland remain in Greenland and continue to instigate anti-Greenland demonstrations and subversive activities. SPF initiates civil unrest in Nantze to disrupt meeting of GPLA and UN by a psyop campaign announcing a US attack. SPF draw security forces to the city with bombings and sniping in the city. SPF and GPLA establish anti-helicopter ambushes and anti helicopter mines along route, and establish ground ambush sites. SPF utilizes laser blinders and GPS jammers to de-synchronize air support, and communicate with cell phones and low level radios to coordinate efforts. Redland UAV provides NRT information.
